

NATURAL RESOURCE MODELING

Volume 12

Spring 1999

Number 1

CONTENTS

Introduction to Special Issue By Roland H. Lamberson.....	1
<i>Research Articles</i>	
Sources, Sinks and Selectivity By Joseph E. Carroll and Roland H. Lamberson	5
Edge Permeability and Population Persistence in Isolated Habitat Patches By R.W. Van Kirk and M.A. Lewis.....	37
The Impact of Age-, Space- and Stochastic- Structure on the Extinction Probability of a Chinook Salmon Metapopulation By Kevin Higgins	65
Effects of Individual Heterogeneity in Estimating the Persistence of Small Populations By Mary M. Conner and Gary C. White	109
A Habitat Based Model for the Distribution of Forest Interior Nesting Birds in a Fragmented Landscape By Allison Kimber DeLong and Roland H. Lamberson	129
Spatial Dynamics of Two Harvested Wild Pig Populations By M.J. Keeling, E.J. Milner-Gulland and L.M. Clayton	147
<i>Book Review</i>	
An Introduction to Structured Population Dynamics (J.M. Cushing) By Kathleen Crowe	171
