

NATURAL RESOURCE MODELING

Volume 14

Fall 2001

Number 3

CONTENTS

Research Articles

- Effects of Domain Size on the Persistence of
Populations in a Diffusive Food-Chain Model with
Beddington-DeAngelis Functional Response
By Robert Stephen Cantrell and Chris Cosner 335
- Effort Subsidies and Entry Deterrence
in Transboundary Fisheries
By John Quinn and Gorazd Ruseski 369
- Dynamics of Spatial Exploitation:
A Metapopulation Approach
By James N. Sanchirico and James E. Wilen..... 391
- A Simplified Feedback Approach to Optimal
Resource Management
By Leif K. Sandal and Stein I. Steinshamn..... 419
- Features and Applications of Bertalanffy-Richards'
and Schnute's Growth Equations
By Lei Yuancai, Carlos Pacheco Marques
and João Manuel Bento 433

Net Notes

- Software Review of JAVA
By Gordon L. Swartzman 453

Research Notes

- Truth in Modeling
By Diane L. Beres, Gordon L. Swartzman,
Colin W. Clark and Anthony M. Starfield..... 457
- Getting "Results": The Pattern-Oriented Approach to
Analyzing Natural Systems with Individual-Based Models
By S.F. Railsback 465
