The Discrete Petrov-Galerkin Method for Weakly Singular Integral Equations
By Zhongying Chen, Yuesheng Xu and Jiansheng Zhao ......................... 1

On the Numerical Solution of Linear Evolution Problems with an Integral Operator Coefficient
By I. Gavrilyuk, V. Makarov and R. Chapko ........... 37

Fast Collocation Solvers for Integral Equations on Open Arcs
By J. Saranen and G. Vainikko .......................... 57

Improving the Accuracy of Quadrature Method Solutions of Fredholm Integral Equations that Arise from Nonlinear Two-Point Boundary Value Problems
By Avram Sidi and James A. Pennline ............... 103
