Rings with involution as partially ordered abelian groups  
By David Handelman ........................................ 337

Boundary behavior of spaces of analytic functions  
By George Brauer ............................................. 383

Nonexistence of partial traces for group actions  
By R.M. Guralnick, I. M. Isaacs and D.S. Passman .. 395

The modular function and the modulus of a doubly-connected region  
By Jacob Burbea ............................................. 407

On summing sequences of 0’s and 1’s  
By J.J. Sember and A. R. Freedman ..................... 419

Connectedness in fuzzy topological spaces  
By R. Lowen .................................................. 427

Modular face lattices: low dimensional cases  
By George Phillip Barker ................................. 435

Meromorphic starlike functions  
By Paul J. Eenigenburg and Albert E Livingston . 441

On some topologies which coincide on the unit sphere of the Fourier-Stieltjes algebra $B(G)$ and of the measure algebra $M(G)$  
By E.E. Granirer and M. Leinert ......................... 459

The ham sandwich theorem and some related results  
By James V. Peters .......................................... 473

Equiconvergence of interpolating processes  
By Bogdan M. Baishanski ................................. 483
