CONTENTS

On Rota’s models for linear operators
   By B.S. Yadav and Ranjana Bansal ............... 553
Extensions of several summation formulae of Ramanujan
   using the calculus of residues
   By Peter J Forrester ......................... 557
Centralizers in differential, pseudo-differential and fractional
   differential operator rings
   By K.R. Goodearl .......................... 573
Duality for infinite Hermite spline interpolation
   By T.N.T. Goodman ........................ 579
Coefficient bounds for quotients of starlike functions
   By H. Silverman ........................... 627
On the Picard group of a compact complex nilmanifold
   By Robert J. Fisher ...................... 631
q-analogue of a transformation of Whipple
   By A. Verma and V.K. Jain ................ 639
Finite harmonic and geometric interpolation
   By J.L. Schiff and W.J. Walker .......... 651
Krull-Schmidt uniqueness fails dramatically over
   subrings of $\mathbb{Z} \oplus \ldots \oplus \mathbb{Z}$
   By Lawrence S. Levy ..................... 659
An inverse problem for a parabolic partial differential equation
   By William Rundell ....................... 679
On the character theory of fully ramified sections
   By I.M. Isaacs ............................ 689
The Pederson ideal and the representation of $C^*$-algebras
   By C.W. Baker ............................. 699
Index to Volume 13 ............................ 709
