ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 21  Summer 1991  Number 3

CONTENTS

Review Article
Generalizations of the Gleason-Kahane-Zelazko Theorem
By Krzysztof Jarosz ........................................... 915

Survey Article
Riemann Integration in Banach Spaces
By Russell Gordon ............................................. 923

Orthomodular Lattices and Quadratic Spaces: A Survey
By Robert Piziak ............................................. 951

Steady-State Turbulent Flow with Reaction
By L. E. Bobisud ............................................. 993

A Switch in Nodal Structure in Coupled Systems of Nonlinear
Sturm-Liouville Boundary Value Problems
By Robert Stephen Cantrell ............................... 1009

A Simple Continued Fraction Test for the Irrationality
of Functions
By R. M. Hovstad ........................................... 1029

On Iterated Torsion Products of Abelian $p$-Groups
By Patrick Keef ........................................... 1035

Pseudo-Convergence in Normed Linear Spaces
By Teck-Cheng Lim ........................................ 1057

Full 2-Con vexity in Bochner $L^p$ Spaces
By Pei-Kee Lin ............................................. 1071

A Method for the Numerical Solution of a Class of
Nonlinear Diffusion Equations
By Luciano Lopez ........................................... 1083

A Survey with Open Problems on Univalent Functions
Whose Coefficients are Negative
By Herb Silverman ........................................ 1099

Focal Subfunctions and Second Order Differential Inequalities
By S. Umamaheswaran and M. Venkata Rama ........... 1127

Errata ........................................................... 1143

Errata for Volume 21, Number 2 ............................ 1145
