ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 22  Spring 1992  Number 2

CONTENTS

A Topological Approach to Morita Equivalence for Rings with Local Units
By G.D. Abrams, P.N. Anh and L. Márki .......................... 405

Unconditionally Converging and Compact Operators on $c_0$
By Elizabeth M. Bator............................................. 417

Prime Ideals and Finiteness Conditions for Gabriel Topologies over Commutative Rings
By Margaret Beattie and Morris Orzech ........................ 423

Polynomial Interpretation of Holomorphic Functions in $\mathbb{C}$ and $\mathbb{C}^n$
By T. Bloom, L. Bos, C. Christensen and N. Levenberg...... 441

On a Measure of Symmetry for Stationary Random Sequences
By Wlodzimierz Bryc .............................................. 471

Geometric Inequalities in Normed Spaces
By S. Busenberg and M. Martelli ............................... 477

On the Representation of Measurable Set Valued Maps through Selections
By Arrigo Cellina and Rinaldo M. Colombo .................. 493

Rimcompactness and Similar Properties in Preimages
By Beverly Diamond .............................................. 505

Duality in Some Vector-Valued Function Spaces
By Patrick N. Dowling ............................................ 511

Existence of Solutions to Boundary Value Problems for Impulsive Second Order Differential Inclusions
By L. Erbe and W. Krawcewicz .................................. 519

Commutativity of Coons and Tensor Product Operators
By Gerald Farin .................................................. 541

An Existence Theorem for Quasilinear Elliptic Equations on the $N$-Torus
By John C. Fay .................................................. 547

Asymptotic Analysis of Quenching Problems
By Marek Fila and Bernhard Kawohl .......................... 563

A Quasilinear System Modeling the Spread of Infectious Disease
By W.E. Fitzgibbon, J.J. Morgan and S.J. Waggoner ....... 579

CONTENTS CONTINUED ON BACK PAGE
Almost Completely Decomposable Torsion-free Groups
By H. Pat Goeters and William Ullery ................. 593

Hausdorff Metric on the Space of Upper
Semicontinuous Multifunctions
By Lubica Holá ............................................. 601

An Algorithm for the Projective Characters
of Finite Chevalley Groups
By Randall R. Holmes ................................. 611

Finite Codimensional Ideals in Banach Algebras
with One Generator
By Krzyztof Jarosz ........................................ 631

Unbounded Multivalued Nemytskii Operators
in Sobolev Spaces and Their Applications
to Discontinuous Nonlinearity
By Tomasz Kaczynski ................................. 635

A Class of Continua which Admits No
Expansive Homeomorphisms
By Hisao Kato and Kazuhiro Kawamura .............. 645

Pullbacks of Banach Bundles
By J.W. Kitchen and D.A. Robbins ..................... 653

Periodic Oscillations in Systems with Hysteresis
By Jack W. Macki, Paolo Nistri and Peitro Zecca ........ 669

A Uniform Geometric Property of Banach Spaces
By V. Montesinos and J.R. Torregrosa ............... 683

Some Noncompact Hyperspaces with the
Almost Fixed Point Property
By Sam B. Nadler, Jr. .................................. 691

Transcendental Operators on a Banach Space
By Fred Richman ...................................... 697

Weighted Splines as Optimal Interpolants
By K. Salkauskas and L. Bos .......................... 705

Matrix Summability of Classes of Geometric Sequences
By Suguna Selvaraj ....................................... 719

An Extension of Askey-Wilson’s $q$-Beta Integral
and Its Applications
By A. Verma and V.K. Jain .......................... 733

A Note on Finite Local Rings
By E.A. Whelan ......................................... 757

Examples of Cylindrical Shock Wave Conversion
by Focusing
By Calvin H. Wilcox ..................................... 761

Extension of Topological Invariant Means
on a Locally Compact Amenable Group
By Zhuocheng Yang .................................... 789
