ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 24  Summer 1994  Number 3

CONTENTS

Representations of Archimedean Riesz Spaces—
A Survey
By WOLFGANG FISCHER  ........................................... 771

Abelian Groups with Semi-Simple Artinian
Quasi-Endomorphism Rings
By ULRICH ALBRECHT  ........................................... 853

On Some Inequalities Involving $(n!)^1/n$
By HORST ALZER  ........................................... 867

Phase Portraits for Quadratic Systems
Having a Focus and One Antisaddle
By JOAN C. ARTÉS AND JAUME LLIBRE  .............................. 875

Bargmann-Type Kernels and Unbounded Subnormals
By AMEEZ ATHAVALE  ............................................ 891

Algebraic Dynamics of Polynomial Maps
on the Algebraic Closure of a Finite Field, II
By ANJULA BATRA AND PATRICK MORTON  ......................... 905

Conformal Invariants for Curves and Surfaces
in Three Dimensional Space Forms
By GRANT CARNS, RICHARD SHARPE AND IYNETTE WEBB  .......... 933

On a Conjecture of R.L. Graham
By FRED YUANYOU CHENG AND CARL POMERANCE ................. 961

Schrödinger Operators and Index Bounds
for Minimal Submanifolds
By SHU-YUEN CHENG AND JOHAN TYSK  ............................ 977

A Characterization of Weak* Denying Points
in $L^p(\mu, X)^*$
By ZHIQAO HU AND BOR-LIU HU  .................................. 997

Point-to-Line Distances in the Plane
of a Triangle
By CLARK KIMBERLING  ......................................... 1009

The Riesz Integral and an $L^p - L^q$ Estimate
for the Cauchy Problem of the Wave Operator
By CHIN-CHENG LIN  ........................................... 1027

Value of a Bohrman at a Point
and at Infinity
By PIOTR MIKusiński AND MOURAD TIGHOURIT ................. 1039

Carleson's Inequality and Quasiconformal Mappings
By CRAIG A. NOLDER  ........................................... 1055

CONTENTS CONTINUED ON BACK PAGE
Hankel Forms of Arbitrary Weight over a
Symmetric Domain Via the Transvectant
By JAAR PEETRE .......................................................... 1065

Symmetries, Topological Degree and a
Theorem of Z.Q. Wang
By PATRICK J. RABIER ................................................... 1087

A Quasilinear Two Point Boundary Problem
By VICTOR L. SHAPIRO .................................................. 1117

On the Equation \(Y^2 = (X + p)(X^2 + p^2)\)
By ROEL J. STROEKER AND JAAP TOP ................................. 1135

The Filling Scheme in Archimedean Riesz Spaces
By RADU ZARAROPOL ..................................................... 1163
