CONTENTS

Finite Relative Determination and the Artin-Rees Lemma
By Enrique Andrade Solís and León Kushner ............... 1767

Perturbed Discrete Sturm-Liouville Problems and Associated
Sampling Theorems
By M.H. Annaby, H.A. Hassan and O.H. El-Haddad ........ 1781

Existence and Uniqueness Results for Ordinary Differential Equations
By Afgan Aslanov .................................................. 1809

On the Prime Number Theorem for a Compact Riemann Surface
By M. Avdispahić and L. Smajlovic ............................... 1837

The Littlewood-Orlicz Operator Ideal
By Qingying Bu, Donghai Ji and Yuwen Wang ............... 1847

A Note on Aronsson’s Equation
By Daniel Drucker and Stephen A. Williams ................. 1859

Double Euler Sums on Hurwitz Zeta Functions
By Minking Eie and Wen-Chin Liaw ............................ 1869

On Weak Compactness in $L_1$ Spaces
By M. Fabian, V. Montesinos and V. Zizler .................. 1885

Cyclic Covers of Rational Elliptic Surfaces
By Lisa A. Fastenberg ........................................... 1895

Converse Jensen Inequality
By P.J. Fitzsimmons ............................................. 1905

The Hoggatt-Bergum Conjecture on $D(-1)$-Triples $\{p_{2k+1}, \ldots, p_{2k+3}, p_{2k+5}\}$ and Integer Points on the Attached Elliptic Curves
By Yasutsugu Fujita ............................................. 1907

CONTENTS CONTINUED ON LAST PAGE
Generalized Baskakov-Beta Operators
By Vilay Gupta and Ali Aral ........................................... 1933

Automorphism Groups of the Extended Quadratic Residue Codes Over
$Z_{16}$ and $Z_{32}$
By Chung-Lin Hsu, Wei Liang Kuo, Stephen S.-T. Yau
and Yung Yu .......................................................... 1947

The Variational Moshane Integral in Locally Convex Spaces
By V. Marrappa ......................................................... 1993

Cauchy-Rassias Stability of Sesquilinear $n$-Quadratic Mappings in
Banach Modules
By Chun-Gil Park and Sun-Young Jang ......................... 2015

Characterization of Strict Convexity for Locally Lipschitz Functions
By Karel Pastor .......................................................... 2029

Composition Operators between Bloch-Type Spaces and Möbius
Invariant $Q_k$ Spaces
By Jordi Pau ............................................................. 2051

A Direct Proof of a Theorem on Monotonically Normal Spaces for Go-
Spaces
By Çetin Vural .......................................................... 2067

On $n$-Power $b$-Happy Numbers
By Xia Zhou and Tianxin Cai ......................................... 2073

Volume Index for Volume 39 ............................................ 2083
